## PRODUCE PAPER BY NEW PROCESS; MECHANIZE LOOMS

FIRST PAPER MADE FROM REEDS -- Ljubljana, Slovenski Porocevalec, 22 May 51

The first paper from arundo donax reeds was recently manufactured in the Rijeka Paper Mill. This reed thrives in the Adriatic area, on the islands, and in the interior of Croatia. The first paper of good quality was made from reeds obtained from the vicinity of Vranjsko Jezero near Zadar.

In the future, arundo donax will play a great part in the making of cellulose. About 50-percent pure cellulose is obtained from this reed.

Arundo donax reeds will be planted in the Neretva River swamps, around Vranjsko Jezero, in Slavonia, and in Lonjsko Polje.

Experts believe they will be able to obtain sugar from arundo donax. They are now experimenting with it for this purpose.

AUTOMATIC DEVICE TO BE INSTALLED ON LOOMS -- Belgrade, Borba, 24 Apr 51

Ljubljana, 23 April -- The machine shop of the Maribor Textile Factory has begun serial production of an automatic device which will be placed on all old looms in the textile industry, enabling one weaver to operate 16 looms at the same time, instead of the present maximum of six looms. The device will automatically rewind weavers' shuttles when they are emptied.

TETOVO SPINNING MILL IN OPERATION -- Zagreb, Borba, 27 May 51

Skoplje, 26 May -- The spinning mill of the Woolen-Textiles Combine, which is under construction in Tetovo, began operation on 25 May. The spinning mill occupies 8,000 square meters of floor space.
